

## OdourBoy OZONATOR & IONISER

### Features

The **OdourBoy** is a state-of-the-art, high-quality machine generating Ozone and Anions (negatively charged particles).

**Ozone** is 'made' from oxygen in the air. It is nature's most effective chemical-free way of eliminating bacteria, viruses, moulds and odours. With an active life of approximately 30 minutes it reverts back to oxygen and naturally freshens up the air.

**Anions** in air greatly benefit people's health at home and in the work place. The benefits differ for the respiratory, cardiovascular, nerve and immune system. High levels of anions are found in nature by the beaches, mountains, forests. High levels of positive ions are found where the air is polluted as the pollution consumes the negative ions.

Scientific studies have shown that exposure to anions relieves the symptoms from hay fever or bronchial asthma.

The portable unit can be placed anywhere in a room. Ozone and Ion generators can be switched on separately and have built-in timer function.

### Technical Data

Model	OdourBoy
Ozone production	6,000 ppm
Ion production	Not specified
Air flow rate	1 lpm
Size L x W x H	200 x 160 x 65mm
Electrical	10W / 100—230V
Weight	700 g

### Applications

Hotels  
Motels  
Rest Homes  
Doctors Rooms  
Dentists Rooms  
Hospitals  
Gyms  
Health clubs  
Offices  
Domestic homes  
Bed rooms  
etc
